Jacob Copeland (#16430978), Siqi Zhao (#17140639), Giovanni Saberon (#00100188), Jaime Curnow (#03336247)

Team Leader Report Week 9

*At this stage we're all working steadily, so I plan to make these briefer. Link to issue tracking can still be found in Appendix.

Activities

- Jamie got installer working silently from command line and is working on server module (Server components).
- Ricky has completed parts of two server modules (Install Server Files, Setup Access Permissions) and has been assigned another (Install SQL server)
- Jacob integrated two of Giovanni's modules (blank password checks, Service pack checks) and worked on some of GIovanni's server modules (MSI Installer, SQL setup) as there is still no indication that he plans to integrate his work into the main .iss file.
- I would like to note here that these reports are always shared with all group members and any group member can remove, edit or discuss any statement they disagree with.
- Testing at ITL moved to 1st Oct as Jacob was away for more job interviews.

Individual Reports

Jacob - covered above

Jamie - covered above.

- Silent install from command line issue: https://github.com/16430978/installer-capstone/issues/42
- Server component install issue: https://github.com/16430978/installer-capstone/issues/16

Ricky (Siqi) - covered above

- Install Server Files:https://github.com/16430978/installer-capstone/issues/27
- Setup Access Permissions:https://github.com/16430978/installer-capstone/issues/30
